

ASJED ANSARI

Senior .NET Full Stack Developer | ASP.NET Core | Angular | Microservices | DevOps | Docker | Kubernetes | Oracle | SQL
Mumbai | +91-8454966338 | asjadansari07@gmail.com | www.asjadansari07.github.io

Professional Summary

Senior Software Engineer with 9+ years of experience building enterprise-scale applications using **C#, .NET Core, ASP.NET, Angular, Microservices, Oracle, and SQL Server**. Skilled in **modernizing legacy banking systems** with cloud-native architectures, **Docker, Kubernetes**, and CI/CD practices. Expertise in REST APIs, secure authentication, **API integrations, database optimization**, performance engineering, and SDLC delivery. Experienced in designing scalable solutions with **Microservices, Ocelot API Gateway**, Worker Services, **Azure DevOps** and **SonarQube**, along with technical leadership, **mentoring, code reviews**, and production support.

Core Skills

Backend Development & .NET Technologies

C#, VB.NET, .NET Core, Entity Framework Core, ASP.NET, ASP.NET MVC, ASP.NET Web API, .NET Framework 4.8 Web API, ADO.NET, Entity Framework, WebForms, Worker Services, Generic Method Implementation, REST API Development, Microservices Development, Multithreading, Web Service, Dependency Injection, Repository Pattern

Frontend Development

Angular, Angular Upgrade, HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX

Database & Performance Engineering

SQL Server, Oracle, LINQ, Data Migration, Query Optimization

API Integration, Security & Identity Management

REST APIs, Third-Party API Integration, API Wrapper Development, XML/JSON Processing, LDAP, Novell LDAP, Azure ADFS, JWT, Certificate-Based Authentication, 2FA, Encryption/Decryption, Secrets Management, Secure APIs, Rate Limiting, AppSec/ InfoSec/ VAPT, Container Image Vulnerability Scanning, CAPTCHA, swagger, postman

Cloud, DevOps & Deployment

Docker, Kubernetes, Kubernetes Secrets, CI/CD, Azure DevOps, Jenkins, IIS Hosting, Cloud Deployment, Containerization, Angular & .NET Deployment, Deployment/Containers Troubleshooting

Software Engineering & Quality

Git, GitHub, Code Review, SonarQube, Code Refactoring, SDLC, Requirement Gathering, System Design, Testing, UAT Support, Documentation, POC Development, R&D, Debugging, Production Support, Issue Resolution, JMeter, AI-Assisted Development (GitHub Copilot, ChatGPT)

Architecture, File Processing & Utilities

Microservices Architecture, N-tier/3 architecture, MVC, Ocelot API Gateway, Worker Service Architecture, Flow Diagram Design, Generic Method Design, PDF Generation, File Upload, Password-Protected ZIP, Custom DLL Development, XML/JSON Processing

Leadership & Collaboration

Team Leadership, Mentoring, Task Assignment, Technical Guidance, Knowledge Sharing, Team Training, Client Communication, Internal Coordination, Daily Stand-ups, Requirement Professional Experience

Key Achievements

- Migrated enterprise banking platform to Angular and .NET Core Microservices.
- Delivered secure integrations with ESB, MQ, SFMS, CHUB, ARC, and third-party APIs.
- Built reusable components to improve maintainability and scalability.
- Resolved InfoSec/VAPT issues and enhanced application security.
- Delivered multiple zero-critical-issue production releases.

- Mentored developers and improved code quality through reviews.
- Optimized performance using database tuning and multithreading.

Core Competencies

- Enterprise Application & Full Stack Development
- Banking & Financial Applications
- Microservices & Cloud-Native Architecture
- REST API Development & Enterprise Integration
- Secure Authentication & Authorization
- Software Design & Solution Architecture
- DevOps, CI/CD & Production Support
- Performance & Database Optimization
- Oracle Development & Troubleshooting
- Requirement Analysis & Full SDLC Execution
- Code Reviews & Technical Leadership
- Team Mentoring & Client Communication

Professional Experience

Senior Software Engineer | Ember Technologies | Aug 2023 – Apr 2026

Project: Vostro Remittance Portal (VRP)

- Modernized legacy banking remittance application by migrating to **Angular** and **.NET Core Microservices** architecture.
- Designed and developed scalable REST APIs using **ASP.NET Core Web API**.
- Implemented Microservices architecture using **Ocelot API Gateway**.
- Upgraded Angular and .NET applications to latest framework versions.
- Integrated enterprise authentication solutions including **LDAP, Novell LDAP, and Azure ADFS**.
- Implemented secure authentication and authorization using **JWT tokens**.
- Developed PDF generation modules using Angular and .NET Core.
- Integrated external banking systems including **ESB, CHUB, ARC, MQ, and 2FA services**.
- Developed XML-to-JSON API wrappers for third-party integrations.
- Implemented certificate-based encryption and decryption mechanisms.
- Managed application secrets using Kubernetes Secrets.
- Containerized applications using Docker and deployed through Kubernetes.
- Implemented CI/CD deployment pipelines using Jenkins.
- Hosted applications using IIS and performed deployment troubleshooting.
- Migrated database from SQL Server to Oracle.
- Developed Oracle stored procedures and optimized database queries.
- Implemented multithreaded processing for performance improvement.
- Developed background processing using Worker Services.
- Implemented API security enhancements including rate limiting.
- Resolved VAPT findings and InfoSec vulnerabilities.
- Performed SonarQube analysis and code quality improvements.
- Developed reusable generic components to reduce code duplication.
- Conducted technical code reviews and guided junior developers.
- Conducted requirement gathering sessions with business stakeholders.
- Created technical documentation, architecture diagrams, and flow diagrams.
- Provided production, UAT, and integration issue support.
- Used Git/GitHub for source control management.
- Improved development productivity using GitHub Copilot and ChatGPT.

Project: Axis Remittance Direct (ARD)

- Implemented enhancements including ESB integration, uKYC API encryption, MQ integration, and user dormancy handling.
- Designed database tables, stored procedures, and deployment scripts.
- Resolved production integration issues.

Project: Anomaly Detection System

- Developed Worker Services for SQL Server and Oracle data extraction.
- Optimized backend performance and resolved application defects.

Project: NTSL

- Developed Excel-based upload modules and improved backend processing.
- Integrated legacy ASP.NET frontend components.
- Resolved IIS hosting and deployment issues.

Software Engineer | Mphasis Ltd | Oct 2019 – Jul 2023

- Developed and maintained enterprise Email and SMS automation applications using C# and VB.NET.
- Migrated legacy VB.NET applications and schedulers to C#.
- Developed SMS services, schedulers, and batch processing applications.
- Integrated CRM APIs and databases for lead management solutions.
- Implemented encryption mechanisms and resolved VAPT findings.
- Provided L3 production support and application troubleshooting.
- Managed deployments, server migration activities, and proof-of-concepts.

Software Engineer | Inogic Technologies | 2018 – 2019

- Customized CRM applications using plugins, workflows, entities, forms, and business rules.
- Migrated legacy CRM JavaScript APIs.
- Developed ASP.NET portals integrated with CRM systems.
- Implemented business logic and application enhancements.

Software Engineer | Paloji Technologies | 2016 – 2018

- Developed multi-tier ASP.NET/C# web applications.
- Designed and implemented REST APIs using JSON.
- Developed SQL Server stored procedures, views, and database objects.
- Built dashboards using FusionCharts.
- Developed responsive user interfaces using HTML5, CSS, and JavaScript.
- Implemented business modules following MVC and layered architecture.

Education

Bachelor of Science (Information Technology) – Mumbai University (64.60%)

Certifications

ASP.NET Core | MVC 5 | Angular | Git | JavaScript

Awards

- 2× Summit Award – Mphasis
- 1× Star Award – Mphasis
- Multiple Client Appreciations
