ASJEDANSARI

SENIOR SOFTWARE ENGINEER

CAREER OBJECTIVE

To obtain a satisfying career with reputed organization, where I can utilize my capabilities for the progress of the organization and personal growth.

PROFESSIONAL SUMMARY

- Senior Software Engineer Around 8+ years of experience in enterprise software development, including 3 years building modern, cloud-native applications using .NET Core, Angular, Docker, and Kubernetes.
- Specialized in microservices architecture, containerized deployments, and secure integrations (ADFS, LDAP, JWT).
- Proficient in building scalable, maintainable web applications using .NET Core, C#, VB.NET, Web API, JavaScript, jQuery, LINQ, and SQL/Oracle.
- Skilled in DevOps practices with hands-on exposure to CI/CD pipelines, automation, secrets management, and secure deployment processes.
- Strong in SDLC execution—from requirements gathering to production support—emphasizing code quality, security, and performance.
- Experienced in mentoring junior developers, leading discussions, and conducting R&D to align technical solutions with business goals
- Leverage AI tools like ChatGPT and GitHub Copilot to boost productivity, accelerate development, and improve debugging and solution design.

EDUCATION

- BSc IT** (Mumbai University) - 64.60%
Akbar Peerbhoy College of Commerce and Economics
- HSC** (Mumbai University) - 63.50%
Akbar Peerbhoy College of Commerce and Economics
- SSC** (Mumbai University) - 66.53%
Mohammed Haji Saboo Siddik Technical High School

WORK EXPERIENCE

Ember Technologies(Senior Software Engineer | Aug 2023 - Present)

Project: Vostro Remittance Portal(VRP)

- Led the migration of Axis Remittance Direct to a modern tech stack (Angular, .NET Core Web API, Oracle) using Docker and Kubernetes
- Authentication & Security:** LDAP (Novell, ADFS), Captcha, 2FA, JWT tokens, certificate-based encryption/decryption, password-protected ZIP
- DevOps & Deployment:** CI/CD, Jenkins, Secrets Management, Jira, SonarQube, Kubernetes, Docker, IIS Hosting
- Architecture:** Microservices, Ocelot API Gateway, API Wrappers (XML to JSON), Custom DLL integration
- Functionality:** File uploads, data migration, bulk DB operations, multithreading, integration with third-party APIs (ESB, CHUB, ARC)

SKILLS

C#/VB.Net	.Net Core
Asp.Net	Ado.Net
SQL/Oracle	Angular
LINQ/AJAX	ADFS/LDAP/JWT
HTML/CSS	Bootstrap
Workerservice	Multithreading
Jquery	JavaScript
JSON/XML	Docker/Kubernetes
Webforms	Google forms
GIT/Github	Sonar/J Meter
Web API	Azure DevOps
MVC Basics	Microservices

CERTIFICATIONS

MVC 5	Mphasis (Jul,2022)
ASP.Net Core	Mphasis (Sep,2022)
GIT	Mphasis (Sep,2022)
Angular 10	Mphasis (Oct,2022)
JavaScript(Open Class Rooms)	Oct,2022

AWARDS

2× Summit Award winner at Mphasis

1× Star Award winner at Mphasis

Multiple client appreciations for customer-centric delivery

COMPUTER SKILLS

OS	Windows
Typing	Around 40wpm
Applications	Office, Icon Editing
Installations	OS and Software

HOBBIES

Reading | Travelling | Music | Gaming

DECLARATION

I hereby declare that the above information is true and accurate to the best of my knowledge.

- **Database:** Extensive work on Oracle DB, LINQ, stored procedures
- **Leadership:** Code review, manual QA, mentoring junior developers, facilitating meetings and requirements gathering

Project: Axis Remittance Direct (ARD)

- Handled change requests including ESB/uKYC API call encryption, MQ connectivity using custom JARs, and user dormancy handling
- Designed and implemented database objects like tables, stored procedures, and scripts

Project: Anomaly Detection System

- Built worker service to extract data from SQL Server and Oracle DBs
- Fixed UI bugs and optimized backend logic

Project: NTSL

- Developed Excel-based upload system.
- Refactored stored procedures and backend logic.
- Merged legacy ASP.NET frontend with backend code.
- Resolved multiple hosting and IIS deployment issues.

Mphasis Limited (Delv Software Engineer | Oct 2019 - Jul 2023)

Project: Aditya Birla Shared Services Limited

- Maintained and enhanced applications sending automated customer communications (Emails/SMS)
- Migrated legacy VB.NET scheduled apps to C#
- Developed and supported SMS applications and schedulers
- Automated repetitive tasks for SMS systems
- Monitored and validated scheduled jobs post-deployment
- Handled encryption/decryption for config files across applications

Project: Aditya Birla Sun Life Insurance Limited

- Collaborated with Marketing & Development teams to deliver PoCs and production CRs
- Delivered lead capture forms with CRM API and local DB integration
- Addressed security vulnerabilities identified by VAPT
- Provided L3 production support with rapid issue resolution

Inogic Tech (India) Pvt. Ltd.- (Software Engineer | 2018 - 2019)

- Customized Microsoft Dynamics 365 CRM using plugins, workflows, entities, forms, and business rules.
- Migrated legacy JavaScript APIs from older CRM versions to D365.
- Developed ASP.NET portals integrated with CRM systems.

Paloji Technologies (Software Engineer | 2016 - 2018)

Projects: Agent CRM | LeoVisaManage | Sofomation

- Built multi-tier web apps with ASP.NET, C#, and ADO.NET
- Developed JSON-based APIs for mobile integration
- Designed and optimized SQL Server stored procedures and views
- Created interactive dashboards using FusionCharts
- Delivered responsive UIs with HTML5, CSS, and JavaScript

Rock products (Back Office Executive | 2015 - 16)

- Provided IT support: hardware/software troubleshooting, installations
- Edited PDFs, images, icons, and handled scanning/printing tasks
